Historic Preservation, Building Codes, and Resiliency

Center for Architecture Sarasota 265 S. Orange Avenue, Sarasota, FL 34236 Friday, February 3, 2017, 8:45 a.m. - 4:45 p.m.

This project has been funded in part with a grant from the Thorne Southern Intervention Fund of the National Trust for Historic Preservation. Additional funding was provided by the Florida Preservation Services Fund and the Sarasota Alliance for Historic Preservation.

WORKSHOP SUMMARY

Historic properties play a major role in many communities as the foundation for thriving neighborhoods, the backbone of business districts, the settings for heritage tourism experiences, the substance of educational programs, and as the centerpieces of cultural events.

This workshop is designed to address the unique way in which historic properties are maintained and rehabilitated within building, fire, life safety, coastal construction, and accessibility codes. Participants will learn how design review is accomplished within a historic district and how creative strategies for code compliance can be successfully incorporated into adaptive use projects. Contemporary challenges such as sea level rise and adaptability strategies will be emphasized.

WORKSHOP AGENDA

8:15 am - 8:45 am 8:45 am - 9:00 am	REGISTRATION Welcome – Lorrie Muldowney, AICP and Linda Stevenson, PhD
